

How to use Sign-it! signature saver for (Android Devices 8.0 or higher)

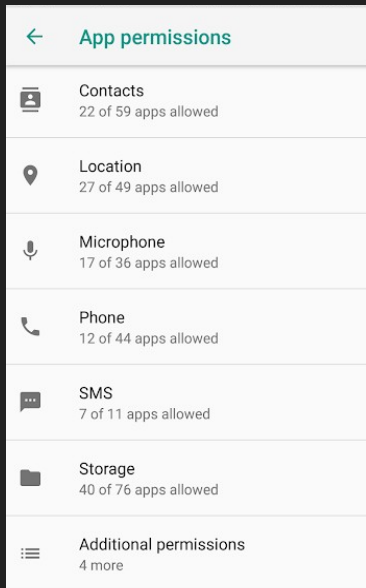

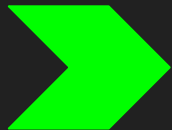

Sally Newcomb

Step 1: App Permissions

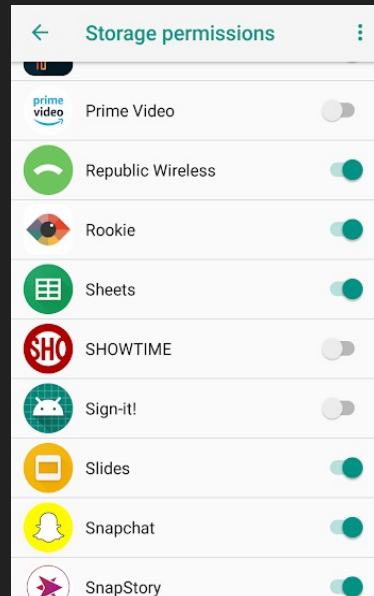

For *Sign-it!* your phones' internal storage is used. You will need to give the app permission to use internal storage.

Go into the settings app and click on Apps & notifications. Then, click on app permissions.

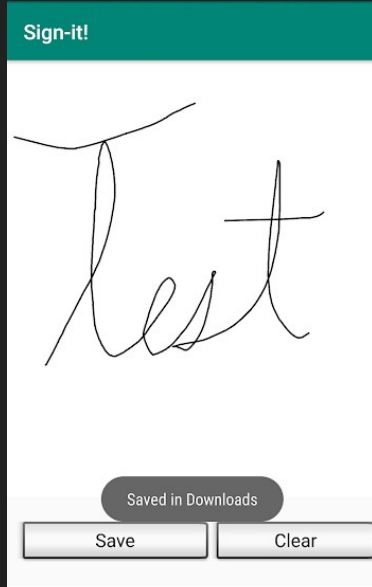

Next, scroll down and find the storage heading and click on it.

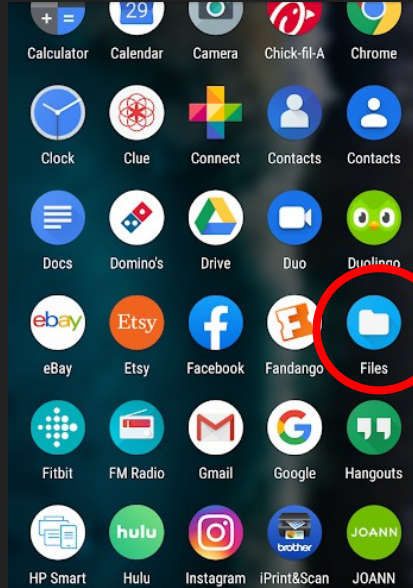

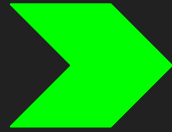

Scroll down to *Sign-it!* Slide the switch if it is not already green.

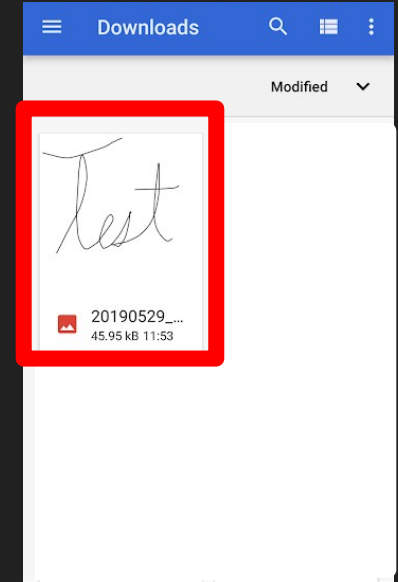

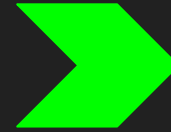

Step 2: Accessing saved photos

Click save when you have desired signature

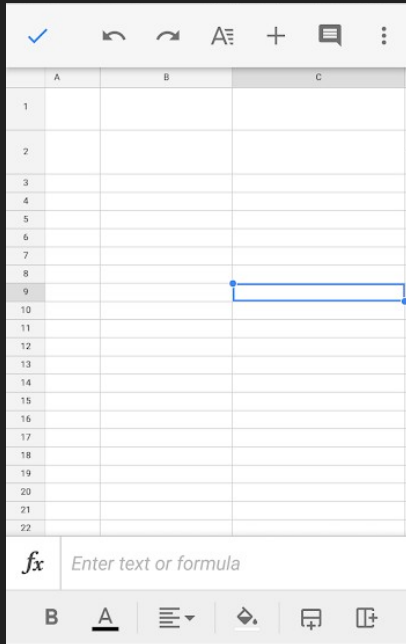

Go to the files application

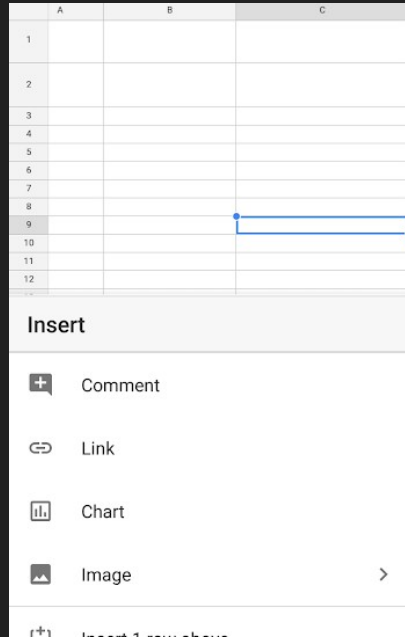

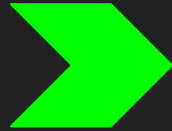

The signature image will show up in the downloads section of the files application

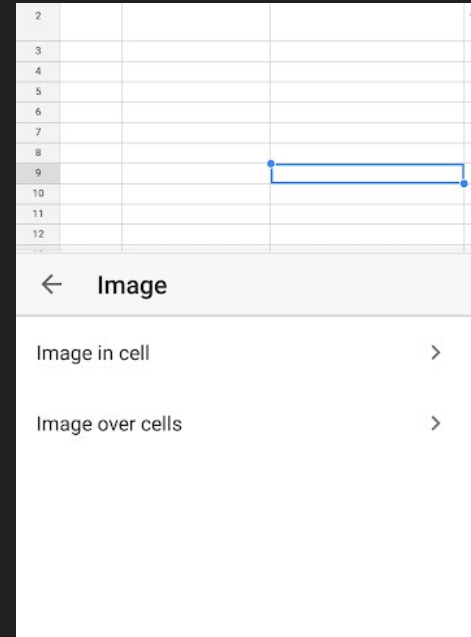

Step 3: Putting the signature in Google Sheets

First, select the box that you want to add a signature to and press the plus sign in the top right corner.

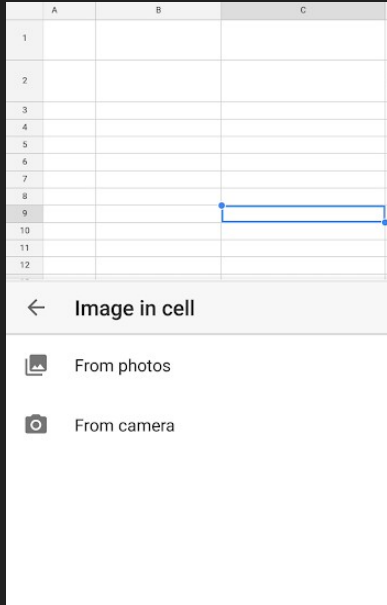

Then, select "Image" in the insert menu.

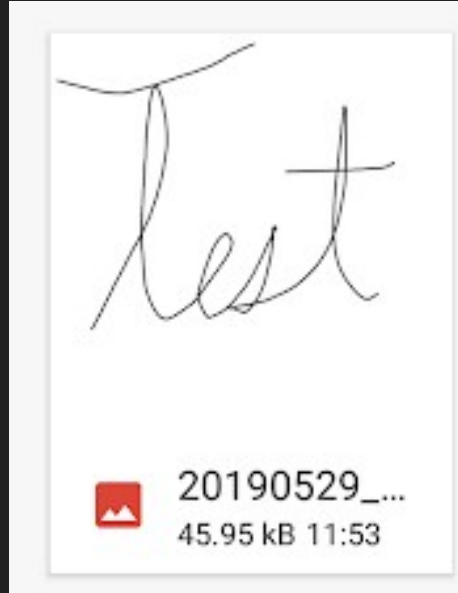

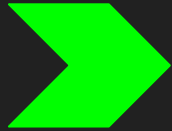

Next, click "Image in cell," this will keep whatever image you select within the cell boundaries.

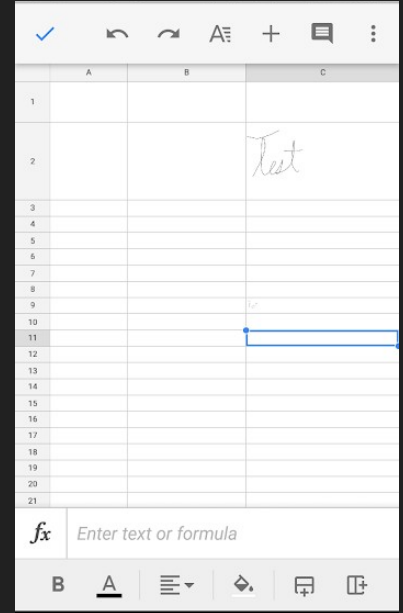

Step 3 Continued

Select "From photos."

Select the signature from the downloads section of the photo directory.

And now the photo is inserted into the google sheets document.
